**Derived from:** Ammonium Sulfate, Methylene Ureas, Urea, Muriate of Potash, Ferric Oxide, Ferrous Sulfate

**Notice:** This product contains the secondary nutrient iron. Iron may stain concrete surfaces and should not be applied on dry or water dampened concrete and should be removed from these areas promptly after application by sweeping or blowing. Do not wash off with water.

## Uses & Features:

ProScape 20-0-5 is a premium zero phosphorus fertilizer. MESA® is an innovative nitrogen source that combines the benefits of methylene urea with ammonium sulfate in a single granule. Our proprietary Meth-Ex brand methylene urea complex relies on microbial activity to provide consistent extended feeding. Our exclusive process also utilizes methylene urea to slow down the release of ammonium sulfate for longer feeding. The ammonium sulfate supplies ammoniacal nitrogen that is immediately available to the plant for fast response. The sulfur, iron and nitrogen combine to maximize color. The result is a fertilizer that gives turf a brilliant rich green color, fast response, and extended feeding, all without excessive surge growth.
