Pond Saver® is a concentrated microbial product containing a proprietary blend of safe, naturally-occurring bacteria that quickly clean and deodorize cloudy, nutrient-rich waters. **Pond Saver®** is nontoxic to humans, plants, and animals, including fish. The minimum bacterial count is 1 billion cfu per gram.

DIRECTIONS FOR USE: Apply 2 teaspoons of Pond Saver per 1000-gallons of water. Repeat application every 2 weeks. For dirtier ponds, apply weekly until water clears. For large ponds, Pond Saver is available in a 5-Lb jar and a 25-lb pail. Follow dose rates and directions supplied with larger packages.

If the pond is severely overpopulated with algae, correct this problem first before using Pond Saver.
