Uses & Features:

ProScape 20-0-7 is a zero phosphorus fertilizer herbicide combination product providing postemergent broadleaf weed control in established turf. It is for use on all cool and warm season turf varieties. ProScape fertilizer with Trimec provides a labor saving one step solution for fertility and weed control. Trimec is one of the most economical and reliable products available for the control of broadleaf weeds in turf. Controlled release nitrogen from Meth-Ex 40 provides extended feeding without excessive leaf growth. Lower volatility and reduced leaching of nitrogen allows plants to use more of the applied nutrients providing a greater value.
