

TRIMEC® PLUS

POST-EMERGENT GRASS & BROADLEAF HERBICIDE

**MSMA containing product:
Control of crabgrass, nutsedge, dallisgrass,
as well as broadleaf weeds.**

Trimec® Plus Grass & Broadleaf Herbicide provides outstanding post-emergent control of annual grassy weeds and yellow nutsedge as well as broadleaf weeds in turf, generally with just one application.

Trimec Plus is Gordon's exclusive pre-mix containing MSMA. Trimec Plus is a flowable formulation designed for product stability, uniformity in the spray solution and ease of handling.

Trimec Plus has been widely tested by university researchers and has been shown

to provide excellent selective grass and broadleaf control – beyond what can be obtained with a tank-mix. Another plus is convenience — applicators favor a pre-mixed combination that can be applied with ease.

Trimec Plus is a pre-mixed product that controls annual grasses, yellow nutsedge and broadleaf weeds now only for golf courses and sod farms.

Trimec is a registered trademark of PBI/GORDON CORPORATION.

FLORIDA: Effective 1/1/2010, Trimec Plus (orange label) cannot be shipped in to or used in the state of Florida.

GRASSY WEEDS

YELLOW NUTSEGE

BROADLEAVES

- *Selective post-emergent control of crabgrass, yellow nutsedge, goosegrass, dallisgrass and broadleaf weeds*
- *Excellent selection for controlling clovers*
- *For use on bluegrass, fescue, zoysiagrass, ryegrass and bermudagrass on golf courses and sod farms*
- *Equal or better control with 10% less MSMA**
- *Controls hard-to-kill broadleaf weeds such as clover, oxalis and spurge*
- *Tested and recommended by numerous university turf researchers*
- *Research has proven Trimec Plus out-performs same ingredient tank-mixes*

*Than single active ingredient MSMA products.

RECOMMENDATIONS

For post-emergent control of nutsedge, grassy and broadleaf weeds in established bluegrass, tall fescue, fine fescues, ryegrass, zoysiagrass and bermudagrass on golf courses and sod farms.
