

## Installation Specifications

At [www.Coronado.com](http://www.Coronado.com) product specifications can be downloaded in CSI format. Coronado gives the customer control over how the stone should be installed.

### Choices specific to Canyon Ledge

- Standard Colors:** Aspen, Brookside, Cape Cod Grey, Chablis, Dakota Brown, Sunset Blend, (Any Standard or Custom Color) \_\_\_\_\_
- Grout Joint Width:** ½" Average Grout Joint, ¾" Average Grout Joint, 1" Average Grout Joint
- Grout Joint Depth:** Deep Raked, Full Brushed, Drystack
- Grout Joint Color:** Natural Grey, Natural Off-White, (Complementary Color) \_\_\_\_\_

### Special Installation Notes

- Pattern:** To achieve the appearance of Canyon Ledge as shown in the catalog, either the top or bottom side of each stone **MUST** be installed on a level or near-level position. Stone should **not** be installed in a vertical position. Select stones from several different boxes to ensure a proper blend of size and color variation. **See brochure photos for recommended installation pattern.**
- Grout Joints:** Stones need to be placed as close together as possible and grouted as deep as possible to achieve a ½" joint at the surface of the grout (this is due to the taper of the stone). In other words, the deeper you rake the grout into the joint, the smaller the grout joint appears. The fuller the grout joint, the wider the joint appears. Detailed grouting styles can be found in the Installation Section of the binder.

**Description:** Canyon Ledge is a combination of smaller Mountain Ledge stones and larger, thicker (up to 3¾") highly textured stones.

**Sizes:** Stone sizes range from 1" to 7" in height and up to 20" in length.

**Thickness:** 1½" to 3¾" (with an average of 2½")

**Packaging:** Available in big boxes (100 square feet) or Dura-Paks (13 square feet). **Square-foot coverage is based on installation with a ½" joint at the back of the stone.**

**Sealing:** Not required. However, if installed on an exterior exposed to excessive water from runoff or improper drainage, we suggest the product be sealed in that particular area to protect it from staining or spalling during freeze-thaw cycles.

**Accessories:** Corners, Matching Pavers, Wall Caps, Post Caps and more. (See Accessories section of binder)
